

Fund Description

The Teucrium Agricultural Fund provides investors unleveraged direct exposure to four core agricultural commodities, namely, corn, wheat, soybeans, and sugar, without the need for a futures account. TAGS invests equally in shares of the Teucrium: Corn Fund, Wheat Fund, Soybean Fund and Sugar Fund; which were each designed to reduce the effects of backwardation and contango.

Why TAGS?

- **Corn, Wheat, Soybeans and Sugar are vitally important** components of the global economy producing food, animal feed, fuels, starches, sugars and a myriad of other byproducts¹
- **Rising world population** is increasing demand for grain crops while decreasing amounts of arable land for crop production
- **Grain crops largest global use is animal feed.** The world’s livestock sector is growing at an unprecedented rate driven by global population growth, rising incomes and urbanization¹
- **Agriculture crop harvests are highly unpredictable** subject to weather, flooding, drought and crop failures with only one harvest per year
- **Liquid exchange traded security** with low correlation coefficient to the S&P 500

Fund Performance as of 06/30/2019

	Three Month	Year to Date	3 Year Annualized	5 Year Annualized	Inception Annualized
NAV	3.20%	-0.94%	-11.26%	-11.95%	-11.65%

Benchmark[^]	3.43%	-0.54%	-10.74%	-11.44%	-11.14%

THE PERFORMANCE QUOTED REPRESENTS PAST PERFORMANCE, DOES NOT GUARANTEE FUTURE RESULTS AND CURRENT PERFORMANCE MAY BE LOWER OR HIGHER THAN THE DATA QUOTED.

Fund Objective

The investment objective of the Fund is to have the daily changes in percentage terms of the Shares’ Net Asset Value (“NAV”) reflect the daily changes in percentage terms of a weighted average of the NAVs per share of four other commodity pools that are series of the Trust and are sponsored by the Sponsor: the Teucrium Corn Fund, the Teucrium Wheat Fund, the Teucrium Soybean Fund and the Teucrium Sugar Fund. The Fund seeks to achieve its investment objective by investing under normal market conditions in the publicly-traded shares of each Underlying Fund so that the Underlying Fund Average will have a weighting of 25% to each Underlying Fund, and the Fund’s assets will be rebalanced, generally on a daily basis, to maintain the approximate 25% allocation to each Underlying Fund.

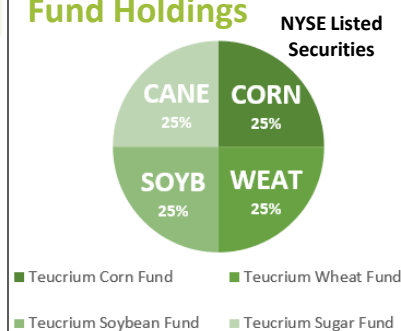

Fund Structure

The Teucrium Agricultural Fund is a commodity pool that will issue Shares that may be purchased and sold on the NYSE Arca. The Fund is a series of the Teucrium Commodity Trust (“Trust”), a Delaware statutory trust. Additional series of the Trust that will be separate commodity pools may be created in the future. The Trust and the Fund operate pursuant to the Trust’s Third Amended and restated Declaration of Trust and Trust Agreement (the “Trust Agreement”). The Fund was formed and is managed and controlled by the Sponsor, Teucrium Trading, LLC. The Sponsor, a limited liability company formed in Delaware, is registered as a commodity pool operator (“CPO”) with the Commodities Futures trading Commission (“CFTC”) and is a member of the NFA. The Sponsor registered as a Commodity Trading Advisor (“CTA”) with the CFTC effective September 8, 2017.

Definitions

Backwardation: A market condition in which a futures price is lower in the distant delivery months than in the near delivery months.

Raw Beta: The sensitivity measure that estimates the percentage price change of security given a 1% change in a representative market index. Raw beta measures the risk of a security relative to the market (represented by an index).

Chicago Board of Trade (CBOT): A commodity exchange established in 1848 that today trades in both agricultural and financial contracts. The CBOT originally traded only agricultural commodities. Now, the CBOT offers options and futures contracts on a wide range of products including metal, U.S. T-Bonds and energy.

Contango: A condition in which distant delivery prices for futures exceed spot prices, often due to the costs of storing and insuring the underlying commodity. Opposite of backwardation.

Correlation: A measure of how two securities move in the market in relation to one another, i.e.; in tandem or inversely. Correlation is represented by the correlation coefficient, which ranges between -1 and +1. A positive correlation coefficient of +1 implies that as one security moves, either up or down, the other security will move in the same direction. A negative correlation coefficient of -1 implies that if one security moves in one direction the other security moves in the opposite direction. A correlation of 0 means that the movements of the securities are not correlated.

Expense Ratio: Defined as the amount of income (loss) required for the redemption value at the end of one year to equal the selling price of the Share, as presented in the Form S-1 dated April 29, 2019.

Intraday Indicative Value (IIV): An Intraday Indicative Value is published by NYSE Alternext US for each Exchange Traded Product (ETP) as a reference value to be used in conjunction with other ETP market information.

Market Price: The current price at which shares are bought and sold. Market returns are based upon the last trade price.

NAV: The dollar value of a single share, based on the value of the underlying assets of the fund minus its liabilities, divided by the number of shares outstanding. Calculated at the end of each business day.

Roll: When an investor replaces an existing futures position with a new one having a later expiration date.

S&P 500: SPX Index - An investment cannot be made directly in an index. Stocks in this example are represented by the Standard & Poor's 500, which is an unmanaged group of securities and considered to be representative of the stock market in general.

Spot: The futures contract month nearest expiration and delivery month for futures contracts.

Teucrium TAGS (TTAGS) Index: A weighted average of the daily changes in percentage terms of the Shares' NAV reflect the daily changes in percentage terms of a weighted average (the "Underlying Fund Average") of the NAVs per share of four other commodity pools that are series of the Trust and are sponsored by the Sponsor: the Teucrium Corn Fund, the Teucrium Wheat Fund, the Teucrium Soybean Fund and the Teucrium Sugar Fund (collectively, the "Underlying Funds"). The Fund seeks to achieve its investment objective by investing under normal market conditions in the publicly traded shares of each Underlying Fund so that the Underlying Fund Average will have a weighting of 25% to each Underlying Fund, and the Fund's assets will be rebalanced, generally on a daily basis, to maintain the approximate 25% allocation to each Underlying Fund. To convert to an index, 100 is set to \$50 the opening day price of TAGS.

Risks and Disclosure

- *Commodities and futures generally are volatile, and instruments whose underlying investments include commodities and futures are not suitable for all investors.*
- *This material must be preceded or accompanied by a prospectus. Please read the prospectus carefully before investing. To obtain a current prospectus visit the links below:*

<http://www.teucriumsoybfund.com/pdfs/soyb-prospectus.pdf>

<http://www.teucriumcanefund.com/pdfs/cane-prospectus.pdf>

- *The Fund and the underlying funds (CORN, WEAT, SOYB AND CANE) are not mutual funds or any other type of investment company within the meaning of the Investment Company Act of 1940, as amended, and is not subject to regulation thereunder.*
- *Because the Fund will invest primarily in commodity futures contracts and other derivative instruments based on the price of the underlying commodities, an investment in the Fund will subject the investor to the risks of that commodity market, and this could result in substantial fluctuations in the price of the Fund's shares.*
- *Shares of the Fund are not insured by the Federal Deposit Insurance Corporation ("FDIC"), may lose value and have no bank guarantee.*
- *Unlike mutual funds, the Fund generally will not distribute dividends to its shareholders. Investors may choose to use the Fund as a means of investing indirectly in commodities, and there are risks involved in such investments.*
- *Prior to the launch of the Teucrium Corn Fund, Teucrium Trading, LLC had never operated a commodity pool. Investors may choose to use the Fund as a vehicle to hedge against the risk of loss, and there are risks involved in such hedging activities.*
- *This material is not an offer or solicitation of any kind to buy or sell any securities outside of the United States of America.*

Performance Disclosure

- On June 30, 2014 TAGS did not trade on the NYSE ARCA. The 4pm Bid/Ask midpoint, which is used for applicable calculations was 36.95. This was 0.60 higher than the 4pm close on 6/25/14 and 1.08 lower than the NAV on 6/30/14.
